

[EN] Cold feelings

Uninvited feelings

They come without a warning and they stay too long

I don't wanna feel

If I run they will be just as strong

I've been a-waiting

I'm waiting for some kind of sign

I try to separate

Try to separate my body from my mind

I watch the clock

As the second hand slowly goes strolling by

I don't want to feel

When a loved one's time comes to die

I've been a-waiting

I'm waiting for some kind of sign

I try to separate

Try to separate my body from my mind

Cold feelings in the night

You know, this feeling just ain't right

And though I try I just can't hide

Cold feelings in the night

Look out!

Yeah, I got faith

But sometimes fear just weighs too much

I don't want to feel

Cold winds blowing through me like an empty touch

I've been a-waiting

I'm waiting for some kind of sign

I try to separate

Try to separate my body from my mind

Cold feelings in the night

You know, this feeling just ain't right

And though I try I just can't hide

Cold feelings in the night

Cold feelings in the night

You know, this feeling just ain't right

And though I try I just can't hide

Cold feelings in the night

Cold feelings in the night

Cold feelings in the night

Cold feelings in the night
